

PIVOTAL METALS

ASX ANNOUNCEMENT

6 November 2023

Pivotal Metals Limited
ABN: 49 623 130 987

ASX: PVT

Amendment to Market Announcement Titled “IMARC Conference Presentation”

Pivotal Metals Limited (ASX:PVT) (‘Pivotal’ or the ‘Company’) is releasing the enclosed amended market announcement titled “IMARC Conference Presentation”, originally announced to the ASX on 31 October 2023. The changes to the original announcement are amendments to the peer group and stated re-rate potential (slide 7), and improved disclosure of the constituent data and assumptions.

This announcement has been authorised by the Board of Directors of the Company.

About Pivotal Metals

Pivotal Metals Limited (ASX:PVT) is an explorer and developer of world-class mineral projects. Pivotal holds 100% of its flagship Horden Lake property, which contains a JORC compliant pit constrained resource of 27.8Mt at 1.49% CuEq, comprising copper, nickel, palladium and gold.

Horden Lake is complemented by a battery metals exploration portfolio in Canada located within the prolific Belleterre-Angliers Greenstone Belt comprised of the Midrim, Laforce, Alotta and Lorraine high-grade nickel copper PGM sulphide projects in Quebec.

MINING JURISDICTION

Disclaimer

The release, publication or distribution of this presentation in certain jurisdictions may be restricted by law and therefore persons in such jurisdictions into which this presentation is released, published or distributed should inform themselves about and observe such restrictions.

DISCLAIMER: The material in this presentation has been prepared by Pivotal Metals Limited ABN 49 623 130 987 ("PVT", "the Company" or "Pivotal") and is general information about the Company's activities current as at the date of this presentation. This information is given in summary form and does not purport to be complete. The material contained in this presentation may include information derived from publicly available sources that have not been independently verified. Information in this presentation should not be considered as advice or a recommendation to investors or potential investors in relation to holding, purchasing or selling securities or other financial products and does not take into account your particular investment objectives, financial situation or needs. Before acting on any information you should consider the appropriateness of the information having regard to these matters, any relevant offer document and in particular, you should seek independent financial advice. No representation or warranty is made as to the accuracy, completeness or reliability of the information. All securities and financial product or instrument transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments.

FORWARD LOOKING STATEMENTS: Various statements in this presentation constitute statements relating to intentions, future acts and events. Such statements are generally classified as "forward looking statements" and involve known and unknown risks, uncertainties and other important factors that could cause those future acts, events and circumstances to differ materially from what is presented or implicitly portrayed herein. Prospective shareholders should not place undue reliance on these words such as "anticipates", "expects", "intends", "plans", "believes", "seeks", "estimates" and similar expressions that are intended to identify forward-looking statements. PVT cautions shareholders and prospective shareholders not to place undue reliance on those forward-looking statements, which reflect the view of PVT only as of the date of this presentation. The forward-looking statements made in this presentation relate only to events as of the date on which the statements are made.

COMPETENT PERSONS: The information in this presentation that relates to the Horden Lake deposit has been prepared and reported in accordance with the JORC Code (2012). The information in the Report that relates to Technical Assessment of the Mineral Assets or Exploration Results is based on information compiled and conclusions derived by Dr. Jobin-Bevans and Mr. Simon Mortimer, both Competent Persons as defined by JORC Code (2012). The Authors have sufficient experience that is relevant to the Technical Assessment of the Mineral Assets under consideration, the style of mineralisation and types of deposit under consideration and to the activity being undertaken to qualify as a Practitioner as defined in the 2015 Edition of the "Australasian Code for Public Reporting of Technical Assessments and Valuations of Mineral Assets", and as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". The Authors consent to the inclusion in the Announcement of the matters and the supporting information based on his information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information included in this presentation and that all material assumptions and technical parameters underpinning the JORC estimates continue to apply and have not materially changed.

The information in this presentation that relates to the Belleterre-Angliers project has been extracted from various reports presented and reviewed by John Paul Hunt Pr.Sci.Nat.Geol. M.Sc, who has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the JORC Code. SRK ES has not independently verified this information for quality control or quality assurance nor been to the sites. John Paul Hunt is a Member of the South African Council for Natural Scientific Professions and a Fellow of the Geological Society of South Africa and is Principal Exploration Geologist of SRK Exploration Services Limited. John Paul Hunt consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

Investment Highlights

Quality assets, well positioned

Critical Metals Leverage

- Copper, Nickel, PGMs
- Vital for energy transition
- Robust supply demand dynamics
- Beneficiaries of green political and capital tail winds

High Quality Assets

- Horden Lake
 - 27.8mt @ 1.49% CuEq²
 - Significant exploration upside
- BAGB
 - Exceptional Ni and Cu grades in core
 - Targeting feeder zone discovery potential

Premier Quebec Location

- Major financing incentives
 - Last PVT fundraise at 85% premium¹
 - \$1B government natural resources Fund
- Extensive mining and smelting region
- Established infrastructure and skills
- Extremely competitive contracting rates

Funded for Re-Rate Catalysts

- ~ \$5.5m cash
- Drilling → enlarge and improve JORC
- Geophysics → demonstrate upside
- Metallurgical testing → refine
- Environmental and social → define

1. Refer ASX announcement dated 16 May 2023

2. Refer ASX announcement dated 16 November 2022 for full JORC breakdown. Refer also appendix for CuEq and resource details.

Quebec

Premier global mining location

Strong mining pedigree

- Prolific cluster of projects, mines and smelters in world-famous Abitibi Greenstone belt.
- Mining is the region's lifeblood, with 22 active mines. The industry directly employs 19,000 people.

'Flow-through scheme' tax incentives

- Flow through tax incentives: Quebec attracts the highest tax credit in Canada for critical metals.
- A\$3.9m raise at 84% premium in May 2023. C\$2.6B raised in 2021-2022 across Canada.

Direct and tangible government assistance

- \$1B Natural Resource and Energy Fund for direct equity investment in mining sector.
- 'Bureau of coordination' seeks more efficient processes and reduced delays for developers.

Vast infrastructure network

- The most extensive power grid in North America. Paved highway within 10km of the project.
- Extensive rail and commercial port network creates logistics flexibility + domestic smelters.

Access to low-cost renewable energy

- Quebec grid is 99% renewable, and ranks amongst the lowest power costs in the world.
- Lowered ESG footprint using 100% renewable power.

Horden Lake

28Mt at 1.5% CuEq*

CU-NI-PGM DEVELOPMENT
PROJECT

The Company confirms that it is not aware of any new information or data that materially affects the information included in this presentation and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

Refer ASX announcement dated [16 November 2022](#) for full JORC breakdown. Refer also appendix for CuEq and resource details.

Horden Lake

Asset of scale with upside ready to be unlocked

27.8 mt @ 1.49 % CuEq

- ✓ 412kt contained CuEq
- ✓ Cu 0.73%, Ni 0.22%, 0.19 g/t Pd, 0.12 g/t Au
- ✓ 55% indicated category
- ✓ 62% in open pit shell
- ✓ Deposit starts at surface

Exploit Upside, Advance Project

- ✓ **Grade:** byproduct credits to come
- ✓ **Tonnes:** Extensive open mineralisation
- ✓ Massive sulphides, and wide zones of mineralisation
- ✓ Favourable development characteristics

Curve Grade Tonnage - Composition
Cut-Off Cu Eq (%)

2024 Program Committed

- ✓ 8,000m diamond drilling
- ✓ Downhole geophysics
- ✓ Resource Update
- ✓ Starting January 2024
- ✓ Project de-risking work in progress

Valuation Opportunity

When compared to ASX peers on a \$EV per contained CuEq basis

Select ASX listed companies of similar stage, with primary project being copper dominant, and of comparable size contained metal equivalent content. Refer appendix Slide 20 for details and sources.

EV = Market cap 3 Nov 23 (closing price), less cash 30 Sept (Appendix 3B), plus debt 30 July (annual report)

Grade Upside

Byproduct credits missing from the resource

Historical focus only on Cu and Ni

- But 2008/12 drilling assayed multi element
- Au, Ag, Co, Pt, Pd all consistently encountered

Current resource understates grade

- Gold currently only modelled over part of deposit
→ grade diluted across whole
- Ag, Co, Pt not included in resource at all
- Never assayed for Rh

2012 assays highlight the opportunity

HN-12-82: 7.7m @ 2.8% Cu, 0.45 % Ni, 1.30 g/t Au, 0.47 g/t Pd

Excluded: 0.05 % Co, 40 g/t Ag, 0.41 g/t Pt

HN-12-84: 15.8m @ 1.7 % Cu, 0.35 % Ni, 0.32 g/t Au, 0.33 g/t Pd

Excluded: 0.03 % Co, 25.9 g/t Ag, 0.05 g/t Pt

HN-12-88: 26.9m @ 2.2 % Cu, 0.58 % Ni, 0.27 g/t Au, 0.56 g/t Pd

Excluded 0.05 % Co, 30.5 g/t Ag, 0.16 g/t Pt

HN-12-91: 12.3m @ 1.1 % Cu, 0.25 % Ni, 0.15 g/t Au, 0.19 g/t Pd

Excluded 0.01 % Co, 16.4 g/t Ag, 0.14 g/t Pt

2024 Program Committed

- ✓ Drilling to infill missing grade assay
- ✓ Resource update for full metal suite
- ✓ Drills mobilise in January 2024

Tonnage Upside

Strong mineralisation open in most directions

Development Considerations

Conventional project with low development hurdles

62% of resource is pit constrained

- ✓ Low cost open pit front-end potential

Thick zones of mineralisation, at 50-60 dip

- ✓ Amenable to bulk mining techniques

High recoveries in testwork

- ✓ 95% Cu to 23% con in rougher

Paved highway within 10km

- ✓ Reduces development capex

Access to the Quebec hydro network

- ✓ Among the cheapest power in the world

Located in a mining jurisdiction

- ✓ Access to labour, contractors and smelters

Refer ASX announcement dated [16 November 2022](#) for full JORC disclosure. Refer also appendix for CuEq and resource details.
Refer ASX announcement dated [25 November 2022](#) for metallurgical testwork disclosure

Geological Setting

Strong structural control for mineralisation

- ✓ Magmatic sulphide deposit associated with mafic and ultramafic rocks
- ✓ Mineralisation occurs along the contact of the gabbroic complex and metasedimentary rocks
- ✓ Mineralisation extends to north-east and is open at depth
- ✓ Two main mineral styles:

Large sulphide blebs to massive sulphide consisting dominantly of pyrrhotite, pentlandite, pyrite and chalcopyrite in shear zones along the contact between gabbro and metasedimentary rocks

Disseminated to blebby pyrrhotite, pentlandite, pyrite and chalcopyrite (locally up to 25% sulphides), prominent in the medium- to coarse-grained gabbro

Section view of Horden Lake, with approximate mineralised envelope shown in red

Belleterre-Angliers Greenstone Belt (BAGB)

EARLY-STAGE
EXPLORATION ASSETS WITH
SUBSTANTIAL POTENTIAL

- 157km² land package covering a prospective suite of gabbroic intrusives in southern Quebec
- Ultra-High grades drilled into gabbroic intrusions by previous operators.
- Historical mining of some deposits

Selected Intercepts for Midrim (MR) and Alotta (ZA)

Hole	From	Interval	Ni (%)	Cu (%)	PGM g/t
MR 17-01	56.6m	9.4m	3.5	4.3	4.6
MR00-05	57.2m	4.3m	6.6	5.2	7.2
MR 01-29	17.6m	18.9m	1.5	2.1	2.4
ZA 18-05	61.2m	11.3m	2.2	2.2	3.1
ZA 18-08	85.2m	9.2m	2.6	2.8	3.6
ZA 19-05	54.0m	17.0m	1.5	2.9	3.3

Multiple Targets

Searching for a deposit of scale

Previous operators kept targeting the same high grade, but small anomalies in top ~200m

What will we do differently?

- ✓ Target broader intrusive complex that could host substantial massive and semi-massive sulphide accumulations
- ✓ Searching for anomalies and targets of real scale
- ✓ 20 priority VTEM anomalies already identified

2024 Program Committed

- ✓ MT Survey to look 200-1,000m deep
- ✓ Extensive data reinterpretation

Geological map with exploration targets recommended for follow up

Consistent News-flow

Funded program will deliver value catalysts for through 2024

Corporate Overview

Committed board, management and shareholders

Board and Management

Position	Name	Expertise
Non-Exec Chair	Simon Gray	Corporate and Commercial Lawyer, Corporate Governance, Capital Markets
Managing Director	Ivan Fairhall	Mechanical Engineer, Private Equity, Mining Executive
Non-Exec Director	Robert Wrixon	PHD Minerals Engineer, Asset Management, Mining Executive
Non-Exec Director	Daniel Rose	Natural Resources Investment Banking, Physical Commodities, Asset Management
Non-Exec Director	Steven Turner	Investment Banking, Business Development, Mining Executive
Exec-Operations	Eddy Canova	Geologist, Project and Operations Management

- ✓ ASX listed since July 2018. Headquartered in Brisbane, Queensland.
- ✓ Experienced and committed board and management team
- ✓ 7% director ownership
- ✓ Supportive shareholder base
- ✓ Top 20 owns 60%
- ✓ Last capital raise at 84% premium utilising Quebec 'Flow-Through Scheme'.

Capital Structure

Share price (3 Nov)	A\$0.019
Shares on issue	544M
Market Cap (undiluted)	10.3M
Debt (30 June)	1.0M
Cash (30 Sept)	5.3M
Enterprise Value	5.6M
Options	75.8M

Why Invest in Pivotal Metals?

- ✓ Exposure to key commodities essential in the transition to sustainable technologies
- ✓ Projects in tier 1 mining jurisdiction with tangible incentives on offer
- ✓ Large (28Mt @ 1.5% CuEq) defined Horden Lake copper-nickel-PGM deposit near infrastructure.
 - ❑ Significant exploration upside remains
 - ❑ Access to infrastructure and low-cost green power
 - ❑ Strategy to grow and advance project
- ✓ Blue sky upside with BAGB exploration
 - ❑ High-grade Ni-Cu-PGM intercepts shows area richly mineralised
 - ❑ VTEM survey indicated multiple deeper high priority anomalies never previously identified
 - ❑ Strategy to derisk and target large system
- ✓ Funding in place for drilling, with strong newsflow expected over next 6-12 months
